

## **11<sup>th</sup> Japan-Italy Conference on Sediment Disaster Prevention Technology**

Trento, Rome and Bari

### **Sunday 11**

9:00-17:00 Trento

Technical visit to Ponte Alto check dams. They are in a deep canyon, carved by the River Fersina over thousands of years. Here, in the 16<sup>th</sup> century some of the oldest hydraulic countermeasures in the world were built in order to protect the city of Trento from sediment disasters.

### **Monday 12**

Time 11:00 CNR headquarter in Roma:

Courtesy visit to the Department of Earth System Science and Environment Technologies, to plan future cooperation activities.

### **Tuesday 13**

Morning: field trip in Montaguto landslide: case study, monitoring system and risk mitigation measures.  
Afternoon: visit to Matera (UNESCO WHS and European Capital of Culture 2019).

### **Wednesday 14**

9:00 to 17:00 Scientific Session on Sediment Disaster Prevention Technology to be held at Accademia Pugliese delle Scienze Villa Larocca Bari
