
TABLE OF CONTENTS

	TABLE OF CONTENTS	i
	SUMMARY	vii
1	INTRODUCTION	1
1.1	Significance of the problem	2
1.2	Ambition of the work	4
1.3	Outline of the work	7
1.4	Specific personal contributions	9
2	STUDY AREAS	13
2.1	Italy	14
2.2	Umbria Region, central Italy	18
2.3	Upper Tiber River basin, central Italy	22
2.4	Collazzone area, Umbria Region	25
2.5	Nera River and Corno River valleys, Umbria Region	27
2.6	Staffora River basin, Lombardy Region, northern Italy	29
3	LANDSLIDE MAPPING	33
3.1	Theoretical framework	33
3.2	Landslide recognition	34
3.3	Landslide inventories	39
3.3.1	Archive inventories	39
3.3.1.1	The AVI archive inventory and the SICI information system	40
3.3.2	Geomorphological inventories	46
3.3.2.1	Reconnaissance geomorphological inventory map for the Umbria Region	47
3.3.2.2	Detailed geomorphological inventory map for the Umbria Region	49
3.3.2.3	Comparison of the two geomorphological inventory maps in Umbria	52
3.3.3	Event inventories	53
3.3.3.1	Landslides triggered by prolonged rainfall in the period from 1937 to 1941	54
3.3.3.2	Landslides triggered by rapid snowmelt in January 1997	54
3.3.3.3	Landslides triggered by earthquakes in September-October 1997	55
3.3.3.4	Comparison of the three event inventories in Umbria	55
3.3.4	Multi-temporal inventories	57
3.3.4.1	Multi-temporal inventory for the Collazzone area	58
3.4	Factors affecting the quality of landslide inventories	61
3.4.1	Quality of landslide inventory maps in the Collazzone area	62

3.5	Summary of achieved results	65
4	ANALYSIS OF THE INVENTORIES	67
4.1	Landslide abundance	67
4.1.1	Statistical landslide density maps	68
4.1.2	Geomorphological landslide density maps	69
4.2	Comparison of landslide inventories	70
4.2.1	Comparison of archive and geomorphological inventory maps	71
4.2.2	Comparison of two geomorphological landslide inventory maps	72
4.2.2.1	Further comparison of the landslide maps in the Collazzone area	76
4.3	Completeness of landslide inventories	80
4.3.1	Completeness of archive inventories	81
4.3.2	Completeness of geomorphological, event, and multi-temporal maps	83
4.4	Landslide persistence	85
4.5	Temporal frequency of slope failures	86
4.5.1	Exceedance probability of landslide occurrence	86
4.5.1.1	Temporal probability of historical landslide events in Umbria	88
4.6	Summary of achieved results	89
5	STATISTICS OF LANDSLIDE SIZE	91
5.1	Background	91
5.2	Methods	96
5.2.1	Statistics of landslide area	96
5.2.2	Statistics of landslide volume	102
5.3	Applications in the Umbria Region inventories	103
5.3.1	Completeness of the landslide inventory maps in the Collazzone area	103
5.3.2	Statistics of landslide areas in Umbria	106
5.4	Discussion	109
5.5	Summary of achieved results	111
6	LANDSLIDE SUSCEPTIBILITY ZONING	113
6.1	Background	114
6.2	Landslide susceptibility methods	115
6.2.1	Assumptions	115
6.2.2	Mapping units	116
6.2.3	Methods	119
6.2.3.1	Geomorphological mapping	120
6.2.3.2	Analysis of inventories	120
6.2.3.3	Heuristic zoning	120
6.2.3.4	Statistical methods	121
6.2.3.5	Process based models	127
6.2.4	Susceptibility methods and mapping units	128
6.3	Probabilistic model for landslide susceptibility	129
6.3.1	Discussion	131
6.4	Landslide susceptibility in the Upper Tiber River basin	132
6.4.1	Discussion	137
6.5	Verification of a landslide susceptibility forecast	138
6.5.1	An example of the verification of a landslide susceptibility model	140
6.5.1.1	Susceptibility model for shallow landslides in the Collazzone area	140

6.5.1.2	Degree of model fitting	142
6.5.1.3	Ensemble of landslide susceptibility models	145
6.5.1.4	Role of independent thematic variables	145
6.5.1.5	Model sensitivity	147
6.5.1.6	Uncertainty in the susceptibility estimate of individual slope units	147
6.5.1.7	Analysis of the model prediction skill	151
6.5.2	A framework for the validation of landslide susceptibility models	154
6.6	Summary of achieved results	158
7	LANDSLIDE HAZARD ASSESSMENT	159
7.1	Background and definitions	159
7.2	Probabilistic model for landslide hazard assessment	162
7.3	Landslide hazard model for the Staffora River basin	164
7.3.1	Probability of landslide size	166
7.3.2	Probability of temporal landslide occurrence	167
7.3.3	Spatial probability of landslides	167
7.3.4	Hazard assessment	172
7.3.5	Discussion	173
7.4	Assessment of landslide hazard at the national scale	176
7.4.1	Spatial probability of landslide events	176
7.4.2	Probability of event occurrence	176
7.4.3	Probability of the consequences	177
7.4.4	Hazard assessment and discussion	178
7.5	Rock fall hazard assessment along the Nera and Corno valleys	180
7.5.1	The computer program STONE	180
7.5.2	Application of the rock fall simulation model	181
7.5.3	Rock fall hazard assessment	184
7.5.4	Discussion	187
7.6	Summary of achieved results	189
8	LANDSLIDE RISK EVALUATION	191
8.1	Literature review	192
8.2	Concepts and definitions	194
8.2.1	Vulnerability and consequence	195
8.2.2	Risk analysis	197
8.2.3	Discussion	198
8.3	Evaluation of landslide risk to individuals and the population	199
8.3.1	Landslide risk to the population in Italy	200
8.3.1.1	Individual landslide risk	201
8.3.1.2	Societal landslide risk	205
8.3.2	Comparison of risk posed by different natural hazards in Italy	208
8.3.3	Geographical distribution of landslide risk to the population in Italy	210
8.3.3.1	Discussion	215
8.3.4	Landslide risk to vehicles and pedestrians along roads	215
8.3.4.1	Landslide risk to vehicles along the Nera River and Corno River valleys	216
8.4	Geomorphological landslide risk evaluation	217
8.4.1	Definition of the study area	218
8.4.2	Multi-temporal landslide map	218

Table of contents

8.4.3	Landslide frequency	219
8.4.4	Landslide intensity	220
8.4.5	Landslide Hazard Zones	220
8.4.6	Landslide hazard assessment	221
8.4.7	Vulnerability of elements at risk	222
8.4.8	Specific landslide risk	223
8.4.9	Total landslide risk	225
8.4.10	Geomorphological landslide risk evaluation in Umbria	226
8.4.10.1	Collevalenza village	226
8.4.10.2	Terria village	230
8.4.11	Discussion	233
8.5	Assessing landslide damage and forecasting landslide impact	235
8.5.1	Landslide damage in Umbria	235
8.5.1.1	Damage to the transportation network and the built-up areas	236
8.5.1.2	Damage to the population	238
8.5.2	Landslide impact	238
8.5.2.1	Expected impact to the transportation network and the built-up areas	239
8.5.2.2	Expected impact to the population in the Perugia Municipality	241
8.5.2.3	Expected impact to the agriculture	242
8.5.3	Discussion	242
8.6	Summary of achieved results	243
9	USE OF LANDSLIDE MAPS AND MODELS	245
9.1	Landslide inventory maps	245
9.2	Landslide density maps	247
9.3	Landslide susceptibility zoning	248
9.4	Landslide hazard assessments	250
9.5	Landslide risk evaluations	252
9.6	Establishing a landslide protocol	253
9.7	Summary of achieved results	257
10	CONCLUSIONS AND FINAL RECOMMENDATIONS	259
10.1	Landslide mapping	259
10.2	Landslide susceptibility zoning	263
10.3	Landslide hazard assessment	265
10.4	Landslide risk evaluation	267
10.5	Concluding remarks	269
10.6	Prospective thoughts	271
